Joseph Li

Sunnyvale, CA | (734) 934-2168 | lijoseph894@gmail.com | LinkedIn | GitHub | Website

SKILLS

Languages: Python, C, C++, CUDA, Go, SQL

ML Frameworks & Tools: PyTorch, TensorFlow, vLLM, scikit-learn, NumPy, Pandas, Linux, Docker, Git

Models & Methods: Mixture-of-Experts, LoRA, Quantization, GRPO, Post-Training, LLM Evaluation, Roofline Analysis

PROFESSIONAL EXPERIENCE

CORTEX AI **Menlo Park, CA**

AI Engineer Intern ***Jun. 2026 - Aug. 2026***

- Designed and launched an LLM API gateway in **Go**, **PostgreSQL**, and **Redis** that routes OpenAI, Anthropic, and **AWS Bedrock** through one endpoint for a 2,000-seat customer and meters $10K in monthly model spend
- Built a pre-release test suite with **GitHub Actions**, expanding coverage from 5 smoke tests to 159 tasks so tool regressions were caught before release
- Established live monitoring in **Langfuse**, adopted by all 9 engineers, tracking per-session latency and failures and routing each failure to the engineer responsible
- Reduced wasted model spend by stopping runaway agent loops and using an **LLM judge** to flag unnecessary tool calls

YOYO MARKETS INC. **New York, NY (Remote)**

AI Engineer ***Aug. 2025 - Dec. 2025***

- Automated manual research and editorial work with a **Python** and LLM generation pipeline, producing **50+ markets per week at 5x the hand-curated rate**
- Developed an **asynchronous Python** scraper tracking 150+ high-signal Twitter accounts in real time, feeding that pipeline **3x the signal volume** of public trend aggregators
- Devised a ranking step that uses pairwise LLM comparisons and Elo ratings to screen 200+ candidate markets per cycle and send the strongest to founder review
- Shipped a **Next.js** review dashboard on **Vercel** that founders use daily, cutting **publishing turnaround from 30 minutes to under 5 minutes**

RESEARCH AND PROJECTS

EFFICIENT LLMS | *PyTorch*, *CUDA*, *LoRA* **Jan. 2026 - May 2026 | USC**

- Converted **Llama 3.2-1B** into a **Mixture-of-Experts** model with **LoRA** adapters and kept held-out quality level with the original, perplexity **9.60 versus 9.66**
- Quantized weights from **FP16** to **INT4**, cutting model size **61%** while keeping generated answers coherent

POWER GRID DISPATCH MODEL | *Python* **Jan. 2026 - May 2026 | USC**

- Engineered a **learning-to-optimize** pipeline for New York's grid, where a model learns generation costs from public load, price, and outage data and an optimizer sets the hourly plan
- Cut the extra cost above the cheapest possible hourly plan **by 47%** versus the old schedule by adding transmission limits and a reserve margin

MATH REASONING FINE-TUNE | *Python*, *LoRA* **Aug. 2025 - Dec. 2025 | USC**

- Trained **Qwen2.5-1.5B** with **LoRA** on 1,000 grade-school math problems to write its reasoning before the answer
- Rebuilt the grader until a correct final answer **scored consistently**, then implemented a **GRPO** trainer that rewards a correct, clearly reasoned solution among 4 candidates

EDUCATION

UNIVERSITY OF SOUTHERN CALIFORNIA **Los Angeles, CA**

M.S. Computer Science | GPA: 3.6/4.0 *Sep. 2024 - May 2026*

Relevant Coursework: ML Accelerators

UNIVERSITY OF MICHIGAN, ANN ARBOR **Ann Arbor, MI**

B.S.E. Data Science | GPA: 3.7/4.0 *Sep. 2020 - May 2024*
