Education

University of Southern California **Sep 2024 - May 2026**

MSE, Computer Science Engineering - Artificial Intelligence

- GPA: 3.50/4.00

University of Michigan, Ann Arbor **Sep 2020 - May 2024**

BSE, Data Science Engineering

- GPA: 3.68/4.00
- ML research: obfuscation techniques for sensitive data

Professional Experience

Cortex AI **June 2026 (current)**

AI Engineer *Mountain view, CA*

- Cortex's product is an AI native productivity OS for office workers. I am building Cortex's agent harness eval system from the grounds up to expose systematic agent performance issues. Currently working on extending the test suite coverage and optimizing tool use efficiency, context management, and agent response stability.

Yoyo Markets Inc. **Jun 2025- Dec 2025**

AI Engineer *New York, NY (Remote)*

- Spearheaded the backend AI pipeline that mines real-time social signals to generate well-defined prediction markets, producing 50/week 5x over the prior manual process)
- Shipped a Next.js internal dashboard on Vercel used daily by the founding team to review, approve, and publish markets, cutting end-to-end publishing time from 30 minutes to under 5

HIKE Investment Management Co. **Jun 2025 - Aug 2024**

Venture Intern *Beijing, China*

- Sourced a Series D semiconductor startup based in the bay and led a team of five through the full diligence process, conducting C-suite interviews, market research, and compiling an investment memo with findings presented directly to the Investment Committee
- Took initiative to research Nvidia's A100 supply chain and roadmap, turning the analysis into a quarterly LP report on how the US-China AI competitive landscape would shape model development

Research Experience

Privacy-Preserving Clinical Text Obfuscation **UMich SOCR Lab 2023 – 2024**

- Built an NLP obfuscation algorithm for unstructured clinical text using named entity recognition and differential privacy, enabling safe use of 10,000 patient records in published research
- Benchmarked across 3 NLP pipelines and achieved 94% entity redaction accuracy while keeping downstream task performance within 3% of the unmasked baseline

Additional Information

- **Languages/Libraries/Framework:** Python, C++, TypeScript, SQL | NextJs | PyTorch | Langfuse, Posthog | Vercel
